

UNTIS 2019 6.0

Bugfixes:

- Fixed a crash related to inconsistent lesson groups allocated to a teacher's lesson
- Timetable: activating the context menu <Add teacher> could lead to a crash (UN-1059)
- Master data-teachers: *Actual-target mean* was not updated upon <Refresh> (UN-665)
- Reductions are now shown corresponding to the active term (UN-1477)
- Yearly average
 - once again contains the value corrections, which is now indicated in the balance line of the lesson printouts(UN-2339)
 - not correct in the Excel-export (UN-2272)
 - not correct on the printouts of the weekly values window (UN-2435)
 - under certain circumstances not correct on the printouts of the teachers-lessons window
- Weekly values: changing the term might change the shown value of the yearly average (UN-1310)
- Substitution planning
 - Swapping lessons was sometimes not counted in a neutral way (UN-920)
 - Auxiliary function <Export the yearly counters as reductions> sometimes exported wrong values. (UN-1054)
 - Report *substitution statement* sometimes did not concur with the values shown under *master data - teachers*. (UN-1808)
 - Substitution statistics: report Overtime NRW sometimes led to incorrect values in connection with free periods. (UN-2043)
 - Substitution statistics for students (NL): in rare cases not correct (UN-1780)
- Course-student-overview:
 - display error after the deletion of a student fixed
 - display error connected to a double click on a course, which led to showing the course in a wrong column, fixed
 - inconsistent behaviour after fixing a window pane, corrected
- Student-course-choice: display error related to showing unselected courses, corrected
- Export NL General: fixed the following problems
 - Partial class is not being exported for an event
 - Cancelled lessons sometimes in the file timetable.txt.
 - Begin- and end-time of a period derived from the main time-grid for events in the case of multi-time-grids.UN-1607
- Edoosys interface: the fields birth date, entry date and exit date are no longer being reset to VOID after each import.(UN-2126)
- Import/export master data-teachers (gpu004.txt): entry and exit date were inverted

Improvements:

- Austrian Federal schools (UPIS): check handler for the social security number implemented
- <Create student groups automatically> Settings-Miscellaneous-Customise implemented
